Technical Skills

- **Frontend & UI:** React.js, React Native, Javascript (ES6+), Tailwind CSS, React Native, Redux, ShadCN
 - **Backend & APIs:** Node.js, Express.js, REST APIs, JWT Auth, OTP Auth, Payment Gateway Integration, Web Sockets
 - **Database & Architecture:** MongoDB, Mongoose, MySQL, MVC Architecture
 - **Architectures:** MVC (Model–View–Controller)
 - **Tools & Platforms:** Git, Figma, Postman, Vercel, SVN, VS Code, Android Studio, MySQL Workbench, Visual Studio
 - **Concepts & Services:** Reusable Component Design, Real Time Features, API Integration, State Management, Cross Platform Mobile Development, Redux Toolkit
-

Experience

Personal Projects

Jan - 2025

- Engineered full-stack web and mobile applications using React.js, React Native, Node.js, Express.js, MongoDB, and REST APIs with focus on scalable architecture and responsive user experiences.
- Built authentication and user management systems including JWT-based login, protected routes, OTP verification, role-based access handling, and dynamic data-driven workflows.
- Developed real-time and CRUD-based functionalities such as blogging systems, product management, category handling, expense tracking, media uploads, and API-integrated dashboard interfaces.
- Designed reusable frontend components and optimized UI/UX flows across web and mobile platforms with emphasis on responsive layouts, structured navigation, and cross-platform consistency.
- Integrated third-party services and backend utilities including Cloudinary, Multer, and real-time data handling to support scalable application performance and media management.
- Collaborated on cross-platform application development with focus on maintainable code structure, reusable architecture patterns, API integration, and modern frontend development practices.

Work Experience - Reveation Technologies

Nov 2025 - Present

- Developed and maintained scalable web applications using React.js, Node.js, MySQL, and reusable component-based architecture with ShadCN UI.
- Built subscription and product management modules with role-based access control, dynamic plan configuration, feature mapping, and admin management functionalities.
- Worked on ERP modules for pharma stockist operations including inventory management, purchase orders, category management, scheme management, sales company management, and multi-role workflows for Super Admins, Admins, Stockists, and Chemists.
- Implemented structured backend architecture using Router, Request Mapper, Response Mapper, Repository, and Handler layers for clean code organization and scalable API development.
- Contributed to React Native applications (Smart Setu and Smartian) by upgrading UI/UX across dashboards, profile management, order management, expense management, tour planning, and role-based navigation systems.
- Developed responsive UI modules and reusable frontend components for multiple internal projects including HRMS systems and enterprise dashboards.
- Collaborated with team members on API integrations, state management, performance optimization, and feature enhancements across web and mobile applications.
- Developed a prototype RBQM Clinical Trial application using React.js, Redux Toolkit, Node.js, Express.js, and MongoDB, implementing Role-Based Access Control (RBAC), centralized state management with Redux Toolkit (Slices, Dispatch, createAsyncThunk), authenticated REST API integration, and role-based follow-up workflows.

Education

Silver Oak University

Bachelor Of Technology - Information Technology

Aug 2021 - May 2025
